Lectures Natural History (Classic Reprint) (Paperback)

By Edward Jesse

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Lectures Natural History After these remarks, I may tell you that it is by a muscular movement of their ribs that fish can propel themselves along dry land, somewhat in the same way that eels and serpents are known to do. Now, if you will look at this sketch of a fish I have brought with me, you will see that what may be called ribs can be used as organs of muscular motion, according to the will of the animal. I should be making this lecture of too great a length if I was to enter more minutely into the particulars of the anatomy of these crawling fishes but I hope enough has been said to convince you that they exist. As to the fact of fish ascending trees, I will only mention one proof of it, which is, that there is a little climbing perch well known to naturalists, and which is found in the mangrove swamps. It can ascend trees like a chimney-sweep, and this it does by only using a...
